Program performance and effectiveness

January - June 2023

ecouch™

e-hub self-help programs

e-hub Health delivers **self-directed online programs** which provide evidence-based information and skills training to prevent or manage the symptoms of common mental health problems.

The programs are based on the best available evidence and evaluated through high quality research.

They can be used anonymously, at any time, from anywhere.

All programs are provided **free of charge** to Australians thanks to funding by the Australian Commonwealth Department of Health.

Acknowledgements

In the spirit of reconciliation e-hub Health acknowledges the Traditional Custodians of country throughout Australia and their connections to land, sea and community. We pay our respect to their Elders past and present and extend that respect to all Aboriginal and Torres Strait Islander peoples today.

We also acknowledge and respect the diversity of our service users, including diversity of ethnicity, gender, sexual orientation, religion, age and disability.

e-hub Health complies with and promotes <u>The Australian Charter of</u> <u>Healthcare Rights</u> and <u>The Charter of Young People's Healthcare Rights</u>.

Program performance and effectiveness

e-hub Health collects quantitative and qualitative feedback from service users about their satisfaction with our services, program usability and accessibility, and user demographics and performance indicators.

The collected information is regularly reviewed to ensure the **safety and quality** of the programs meet the needs of consumers, and to inform quality improvement requirements.

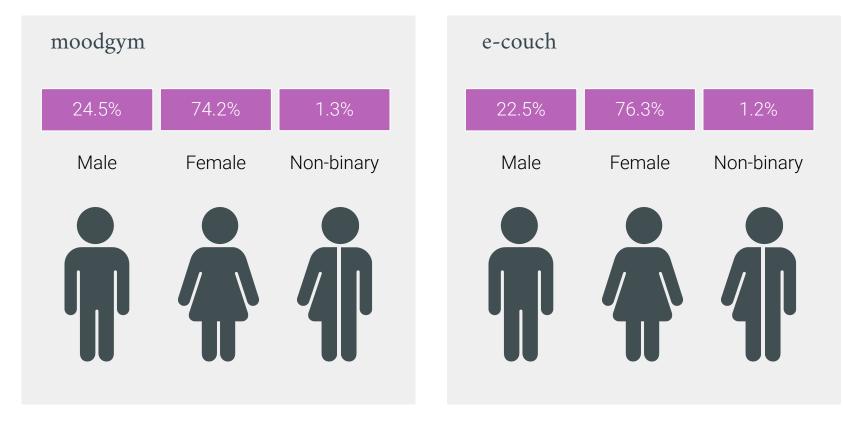

This report is based the period from **January 1 2023 to June 30 2023**, and includes information collected from Australian users who have used the moodgym and e-couch programs.

Contents

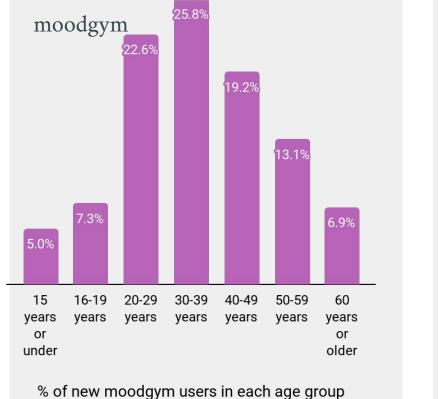

- 1. Service user demographics
- 2. Service user feedback and satisfaction
- 3. Symptoms and effectiveness
- 4. Delivery performance and program improvements
- 5. How can I get involved?

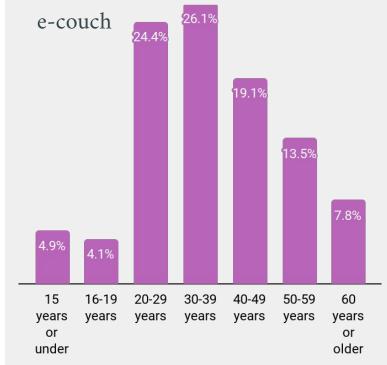

Service user demographics

Gender

Age group

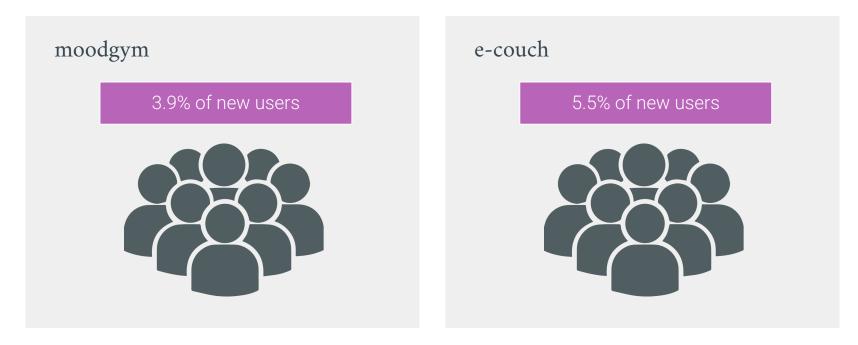

% of new e-couch users in each age group

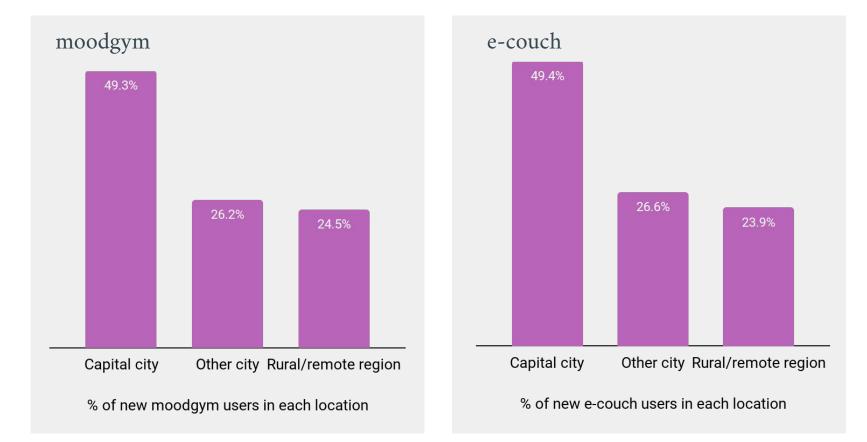

Aboriginal and Torres Strait Islander Users

This information is collected so that e-hub Health can monitor trends in access and outcomes for Aboriginal and Torres Strait Islander service users, and to inform improvement strategies for culturally safe digital mental health care.

Location

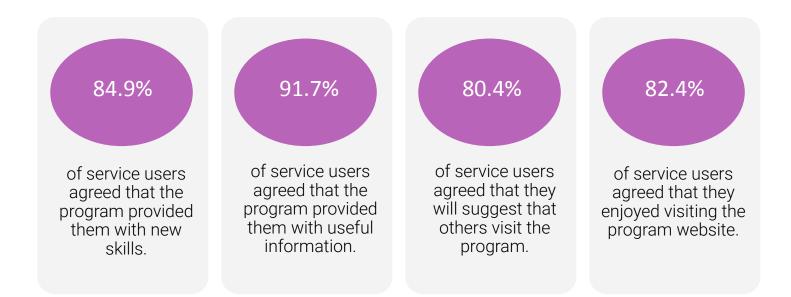

Referral by a health professional (e.g. GP, psychologist)

Service user feedback and satisfaction

Service user satisfaction

When we asked e-couch and moodgym users about how satisfied they were with the program:

Service user feedback

We asked e-couch and moodgym users about *what worked*, *what did not work well*, and *the best bits* of the programs. Here is a summary of this feedback:

What worked:

- Learning coping skills
- I loved the worksheets and filling out quizzes
- Identifying warpy thinking and ways to change them
- Example characters
- Learning techniques to fight warpy thoughts
- Information regarding social anxiety

What did not work well:

- Parent quiz. But it may be useful to others
- Some quizzes where not relevant to this stage of my life
- None really, all useful
- I was not clear on timing of doing each module
- I found it hard to do some of the reflective exercises

Best bits:

- User enjoyed the interactive parts and quizzed
- Flexibility to complete modules on my own terms
- Information is precise and helpful
- I could process resolving conflict in my own time
- I can access the course materials without having to go outside

Symptoms and effectiveness

Depression and anxiety symptoms

New moodgym and e-couch users complete initial depression and anxiety symptom screening scales¹.

moodgym	
Mean depression score: 5.9 (SD=2.0, N=9,603)	
Mean anxiety score: 6.3 (SD=2.1, N=9,358)	

e-couch

Mean depression score: 6.2 (SD=2.1, N=2,528)

Mean anxiety score: 6.7 (SD=2.1, N=2,454)

Mean social anxiety score: 7.9 (SD=5.9, N=2,387)

The mean score for the general population on these scales is 2 (depression and anxiety) and 2-3 (social anxiety). This indicates that service users have elevated levels of depression and anxiety symptoms.

¹ Depression and anxiety measured using the Goldberg Depression and Anxiety scales - score range 0-9 (Goldberg, 1988). Social anxiety measured using the Social Phobia Screener (SOPHS) - score range 0-20 (Batterham, 2017).

Change in service users' symptoms

Service users may complete additional symptom quizzes throughout their use of the programs and we are able to report on the average symptom improvement experienced by these service users.

moodgym

For service users who completed 3 or more modules, both depression and anxiety symptom scores improved:

Mean **depression score improved** from 5.8 (SD=2.2) to 4.9 (SD=2.7)*

Mean **anxiety score improved** from 6.1 (SD=2.2) to 5.3 (SD=2.7)*

* p<.001 Which means that there is a high level of statistical significance for these changes.

Change in service users' symptoms (cont.)

e-couch

For service users who completed at least one toolkit module in the relevant program, symptom scores improved:

Depression program

Mean **depression score improved** from 6.4 (SD=2.0) to 6.3 (SD=2.2)* Mean **anxiety score improved** from 6.2 (SD=2.6) to 6.0 (SD=2.4)*

Anxiety & worry program

Mean **depression score improved** from 5.4 (SD=2.3) to 5.2 (SD=2.5)* Mean **anxiety score improved** from 6.7 (SD=2.0) to 6.3 (SD=2.3)*

Social anxiety program

Mean social anxiety score improved from 11.5 (SD=4.9) to 10.6 (SD=5.4)*

Program Effectiveness

e-hub Health programs have been evaluated in a large number of scientific trials undertaken by research groups around the world.

This research has established the effectiveness of the programs in a range of settings and with different population groups.

For more information about published, peer-reviewed research, visit <u>e-hub Assist</u> (<u>assist.ehubhealth.com/evidence</u>).

Delivery performance and program improvements

Email support response time

e-hub Health's program support team responds to service users' email enquiries.

The team aims to respond to all enquiries within three business days.

Average response time

Enquiries that are clinical in nature or require referral to other services are attended to by e-hub Health's clinical psychologist.

Web service uptime

All programs were delivered securely and continuously during the reporting period, with 1 planned downtime for each of moodgym and e-couch for database maintenance (less than 1 minute).

Program improvements

- e-hub Health programs were accredited to Australian National Safety and Quality Digital Mental Health Standards in June 2023.
 - e-hub Health programs will be added to the <u>Register of</u> <u>accredited service providers</u> in August 2023.
- Additional password recovery questions were added to moodgym and e-couch registration, in response to user feedback.
- Several examples for the 'Iffy' character were updated in moodgym based on user feedback.
- Six depression treatment reviews were updated on BluePages.

How can I get involved?

e-hub Health is committed to engaging and partnering with consumers.

We value insights from service users and the positive contribution this makes in improving the safety and quality of our programs.

Provide program feedback

e-couch and moodgym include feedback forms, and feedback about BluePages can be shared using BluePages 'contact us'.

Learn more, contribute and share

<u>e-hub Assist (assist.ehubhealth.com</u>) provides additional information and ways to get involved:

- Provide feedback about all aspects of our services, including our program performance and evaluation criteria
- Join our customer advisory group
- Share your experience of our services
- Contact us
